(54) Title: METHOD AND APPARATUS FOR SELECTING BROADCAST PROGRAMS

(57) Abstract: A method for selecting a broadcast program is conducive for worldwide or global use. According to an exemplary embodiment, the method includes steps of receiving a first user input representing a first digit associated with the broadcast program, storing first data representing the first digit within one (T1) of a first predetermined time interval for a first region and a second predetermined time interval for a second region, and processing the first data for selecting the broadcast program.
